

## The Rink @ JCube, Singapore

### Safety guidelines

#### 1) Distancing

The guidelines has been 2m apart for seating and 16 sq m for circulation space

This reduced our seating gallery capacity to 89 at each 2 hr session.

You can gather what measures had to be put in place to control the access to the rink throughout the day.

#### 2) Access control

Nationwide we have adopted the use of the QR code for entry and exit of the premises, be it the mall, f&b outlets or a business facility.

This will be in place for quite some time, event after the announcement of the re-opening of sports facilities. Numbers accessing the facility will also be limited.

#### 3) Re-shaping the engagement

Since the closure, there has been various initiatives to keep skaters engaged

To this end, we have enlisted the help of our coaches to produce video clips on conditioning and staying fit and healthy

IG & FB have been particularly effective for us in engaging and connecting with our skating community.

#### 4) Webinars

There has also been sharing and exchange of ideas, initiatives and discussions on how the sports environment will be like post covid-19

This platform is a good way for all of us to rally support and leverage on each other on this new journey.

Personally, am privileged and honoured to be part of the panel.
