No.0012 10 May 2024

Video Test Judging Guidelines Updates

1. The video must be unedited and use a single camera. Each part of the recording must be in continuous take and cannot be broken into several recordings.
2. Skaters should present themselves in proper skating attire and with neat hair appearance.
3. Skaters should introduce themselves on camera with their name, home rink and the test level they are submitting.
4. The video must be filmed on clear ice (with no other skaters) and be unedited from a single camera.
5. A short rest is allowed in between the compulsory portion and the skating of the program; however filming must be continued during that time period.
6. Freestyle Test
 - The video must show each required compulsory maneuver attempted two times (performed in the same order as listed in the current ISI Handbook) and then followed by the non-stop program.
 - The required dance step turns for that test level must be performed two times in isolation (alone) before completing the entire dance step sequence two times for the compulsory portion of the test.
7. Before sending the video to ISIAAsia, watch and review the video to make sure all the requirements are met. Also check specific maneuvers so everything can be clearly seen – like the angle of both legs in the Split Lutz jump, etc.
8. If you are trying to meet a competition entry deadline, please allow at least 30 days to receive test results.
9. If a skater does not pass, he/she can have **one additional attempt** before he/she will need to resubmit the Test Judging application and fee for any subsequent video submissions of his/her test. Video must be sent **within one month** upon receipt of the test result of the first attempt. Skaters have to resubmit the application if the test is not passed within the specified period.
10. All the videos submitted become property of ISIAAsia.
